Vibe-engineering

Future of the job

1- Do you really know ChatGPT ??

CHATGPT.md

GPTs / Projects / Gems

Task: Write a Linkedin post

CHATGPT.md

Skills

Task: Write a technical article

CHATGPT.md

Create skill !

- * deep research
- * security

CHATGPT.md

Skills + connectors

*Task: Create PRD and add it
to Linear + schedule a team
meeting for architecture*

2- Context engineering

TOOLS.md

```
response = client.responses.create(  
    model="gpt-5",  
    instructions="Respond only with a h  
    tools=tools,  
    input=input_list,  
)
```

```
tools = [  
    {  
        "type": "function",  
        "name": "get_horoscope",  
        "description": "Get today's horoscope for an astrological sign.",  
        "parameters": {  
            "type": "object",  
            "properties": {  
                "sign": {  
                    "type": "string",  
                    "description": "An astrological sign like Taurus or Aqu  
                },  
            },  
            "required": ["sign"],  
        },  
    },  
]
```

Before MCP

After MCP

Context engineering Skill vs MCP

Traditional approach

77.2k/200k tokens

- System prompt: 3,000
- Custom tools: 2,000
- MCP tools: 72,000
- Messages: 200
- Free space: 122,800 (tokens)

Pressure Testing Claude-2.1 200K via "Needle In A HayStack"

Asking Claude 2.1 To Do Fact Retrieval Across Context Lengths & Document Depth

Goal: Test Claude 2.1 Ability To Retrieve Information From Large Context Windows

A fact was placed within a document. Claude 2.1 (200K) was then asked to retrieve it. The output was evaluated (with GPT-4) for accuracy.

This test was run at 35 different document depths (top > bottom) and 35 different context lengths (1K > 200K tokens).

Document Depths followed a sigmoid distribution

3- Vibe-code your prototype

GOOGLE-AI-STUDIO.md

Demo !

Task:

- * recode your preferred video-game*
- * recode tronche2tek*

A blurred image of a high-speed train moving through a tunnel, with light streaks on the walls and ceiling, creating a sense of motion and speed.

Buy vs Build

4- Vibe-engineering & Claude Code

CLAUDE-CODE.md

/loop

The background of the slide is a dark, blurry photograph of a boat moving across a body of water at night. The boat is dark and indistinct, but a bright light trail is visible behind it, suggesting motion. The water is dark with some ripples. The sky is a uniform dark grey.

5- Studying in software engineering in 2026

A blurred image of a high-speed train moving through a tunnel, with light streaks on the walls and ceiling, creating a sense of rapid motion.

Code is cheap

Buy vs Build

A blurred night photograph of a cityscape. In the center, a car's headlights and taillights create a horizontal streak of light, suggesting motion. The background shows silhouettes of buildings and trees against a dark sky. The foreground is a dark, reflective surface, possibly water, which mirrors the light from the car and the city lights.

Uninstall your IDE

Use your brain

A person is seen from behind, wearing a VR headset and sitting at a desk. The room is dark, with light coming from several computer monitors. The person's silhouette is prominent against the glowing screens. The text "Review everything" is overlaid in the center in a large, white, sans-serif font.

Review everything

AI for brainstorming

A blurred night scene of a city street with a person walking in the foreground. A grid of squares is overlaid on the right side of the image.
