

A person wearing a VR headset is seated at a desk in a dark room. Several computer monitors are visible, some displaying code or data. The scene is dimly lit, with light from the screens illuminating the person's face and the desk.

Future of work

Samuel Berthe

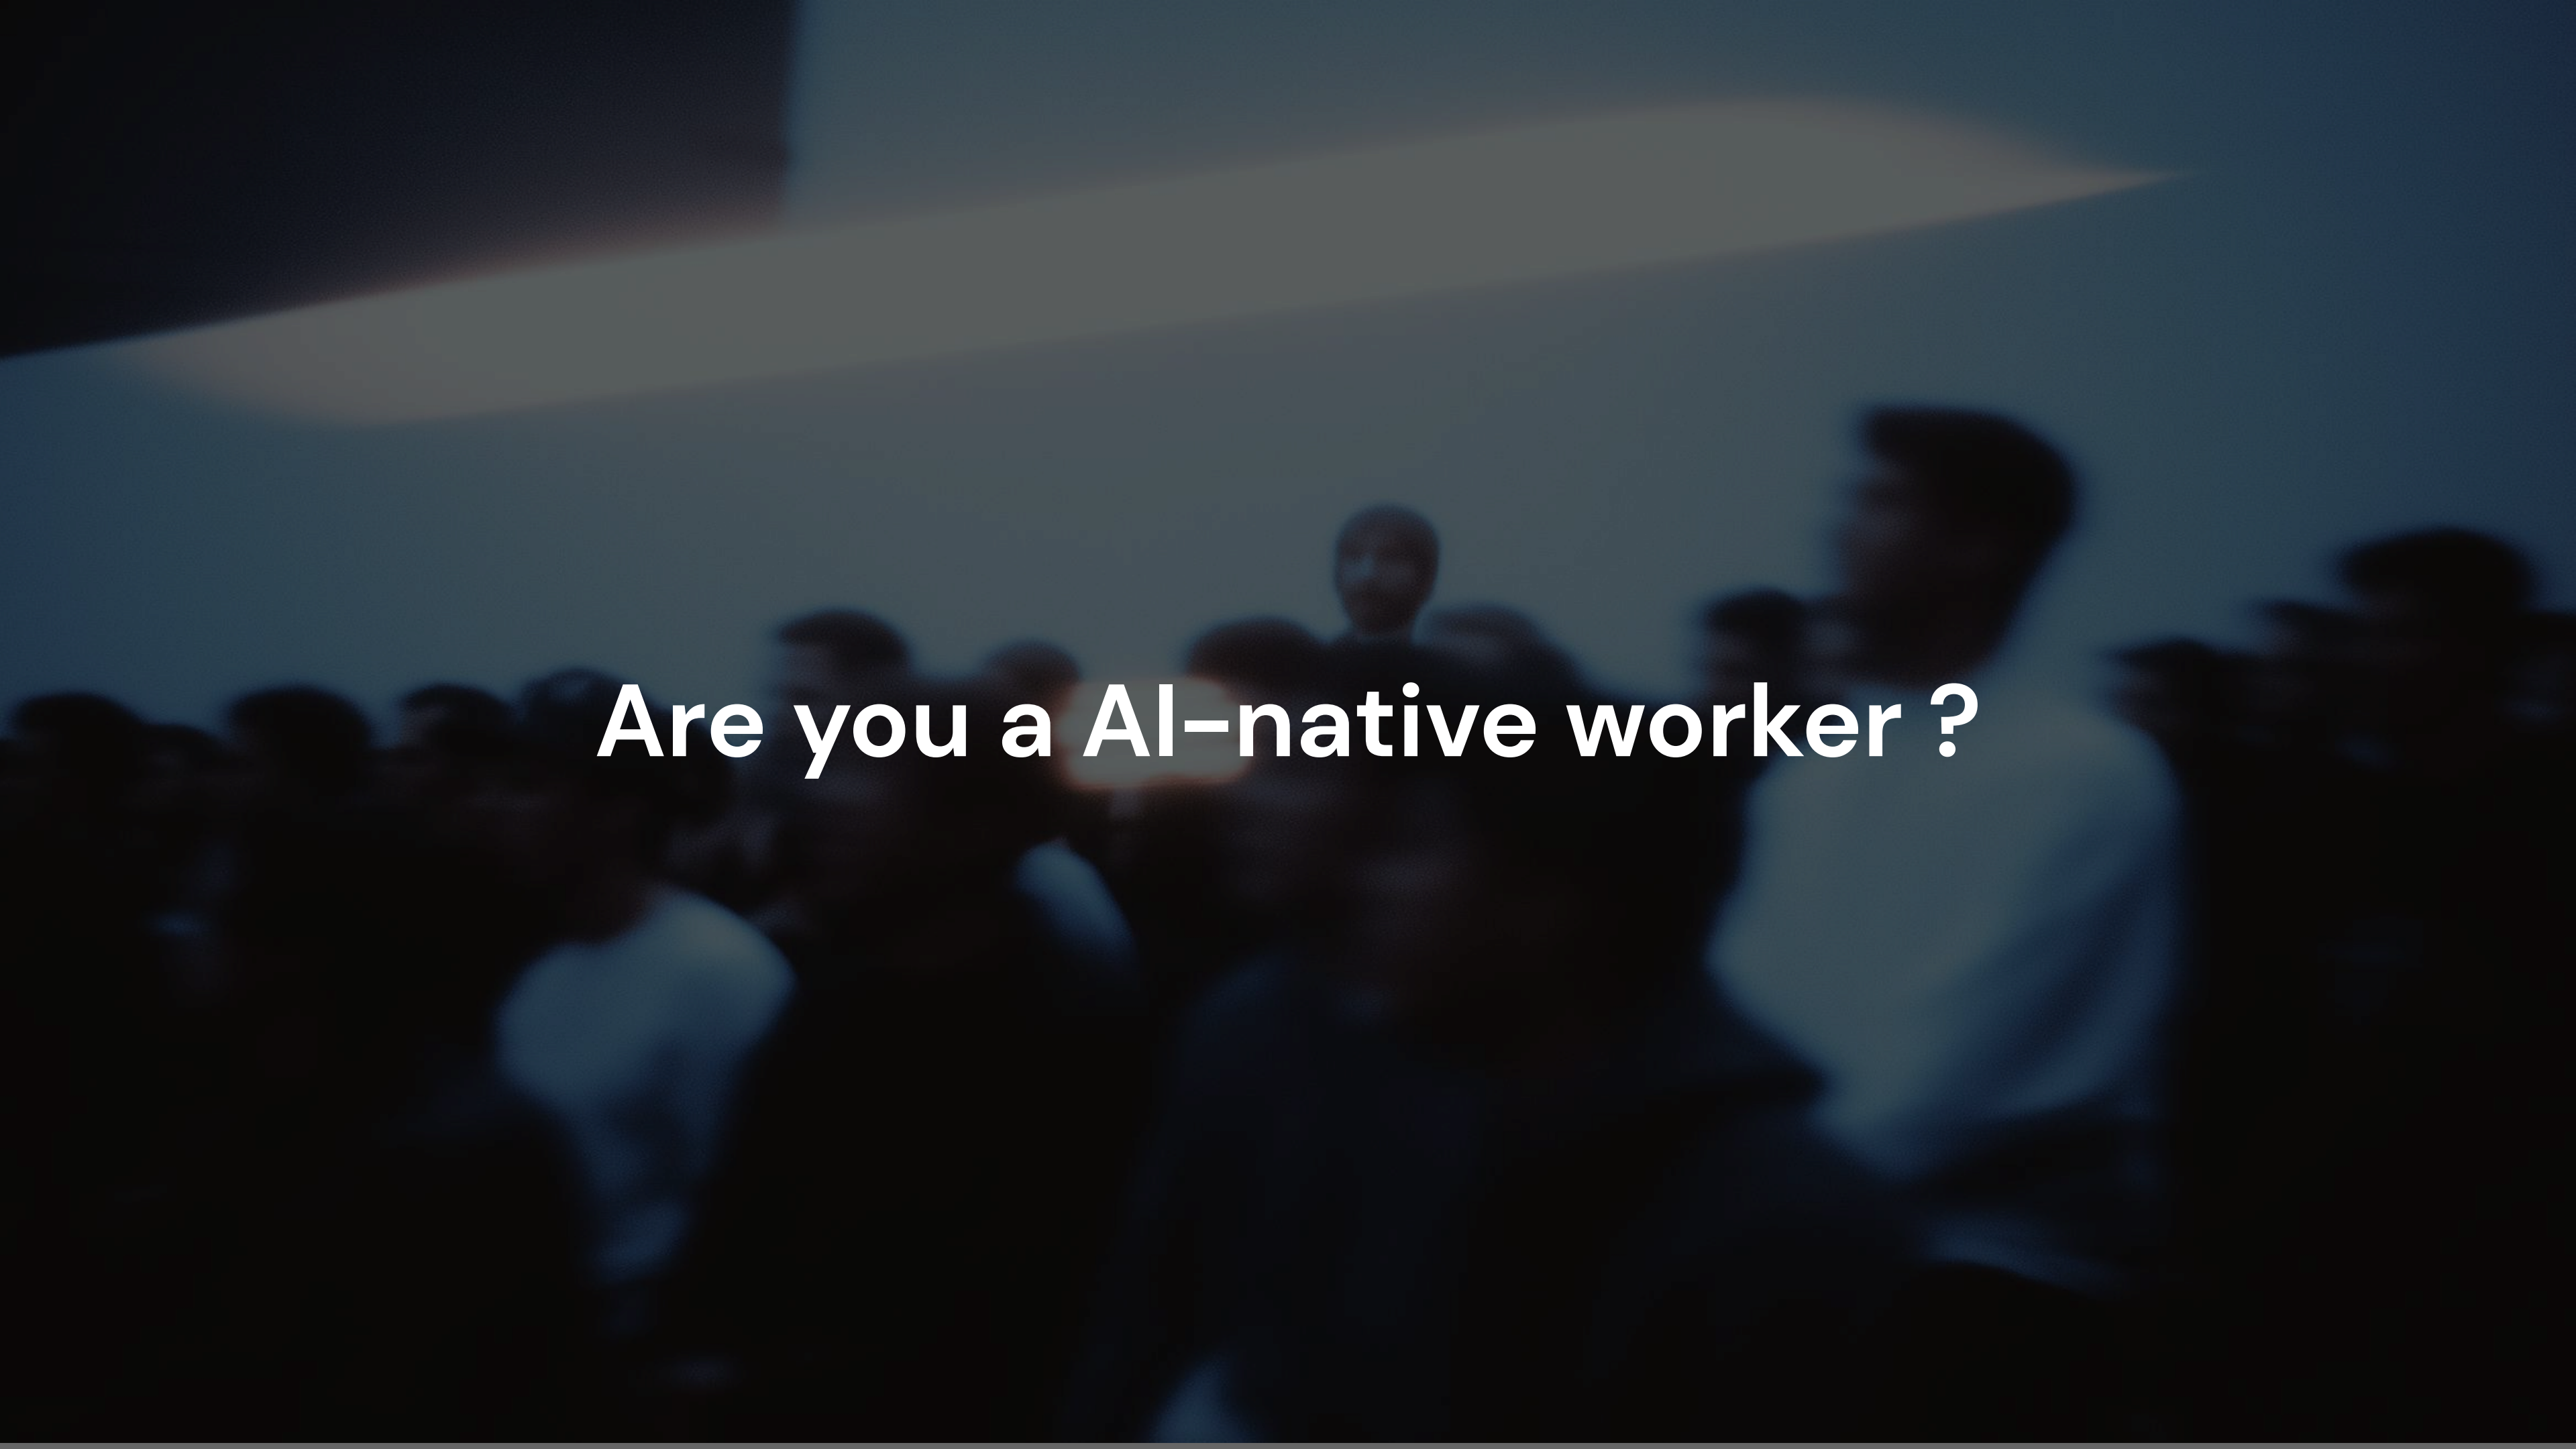

OSS developer & token-freak

A blurred, dark blue-toned image of a city skyline at night, with lights from buildings and streets visible in the background.

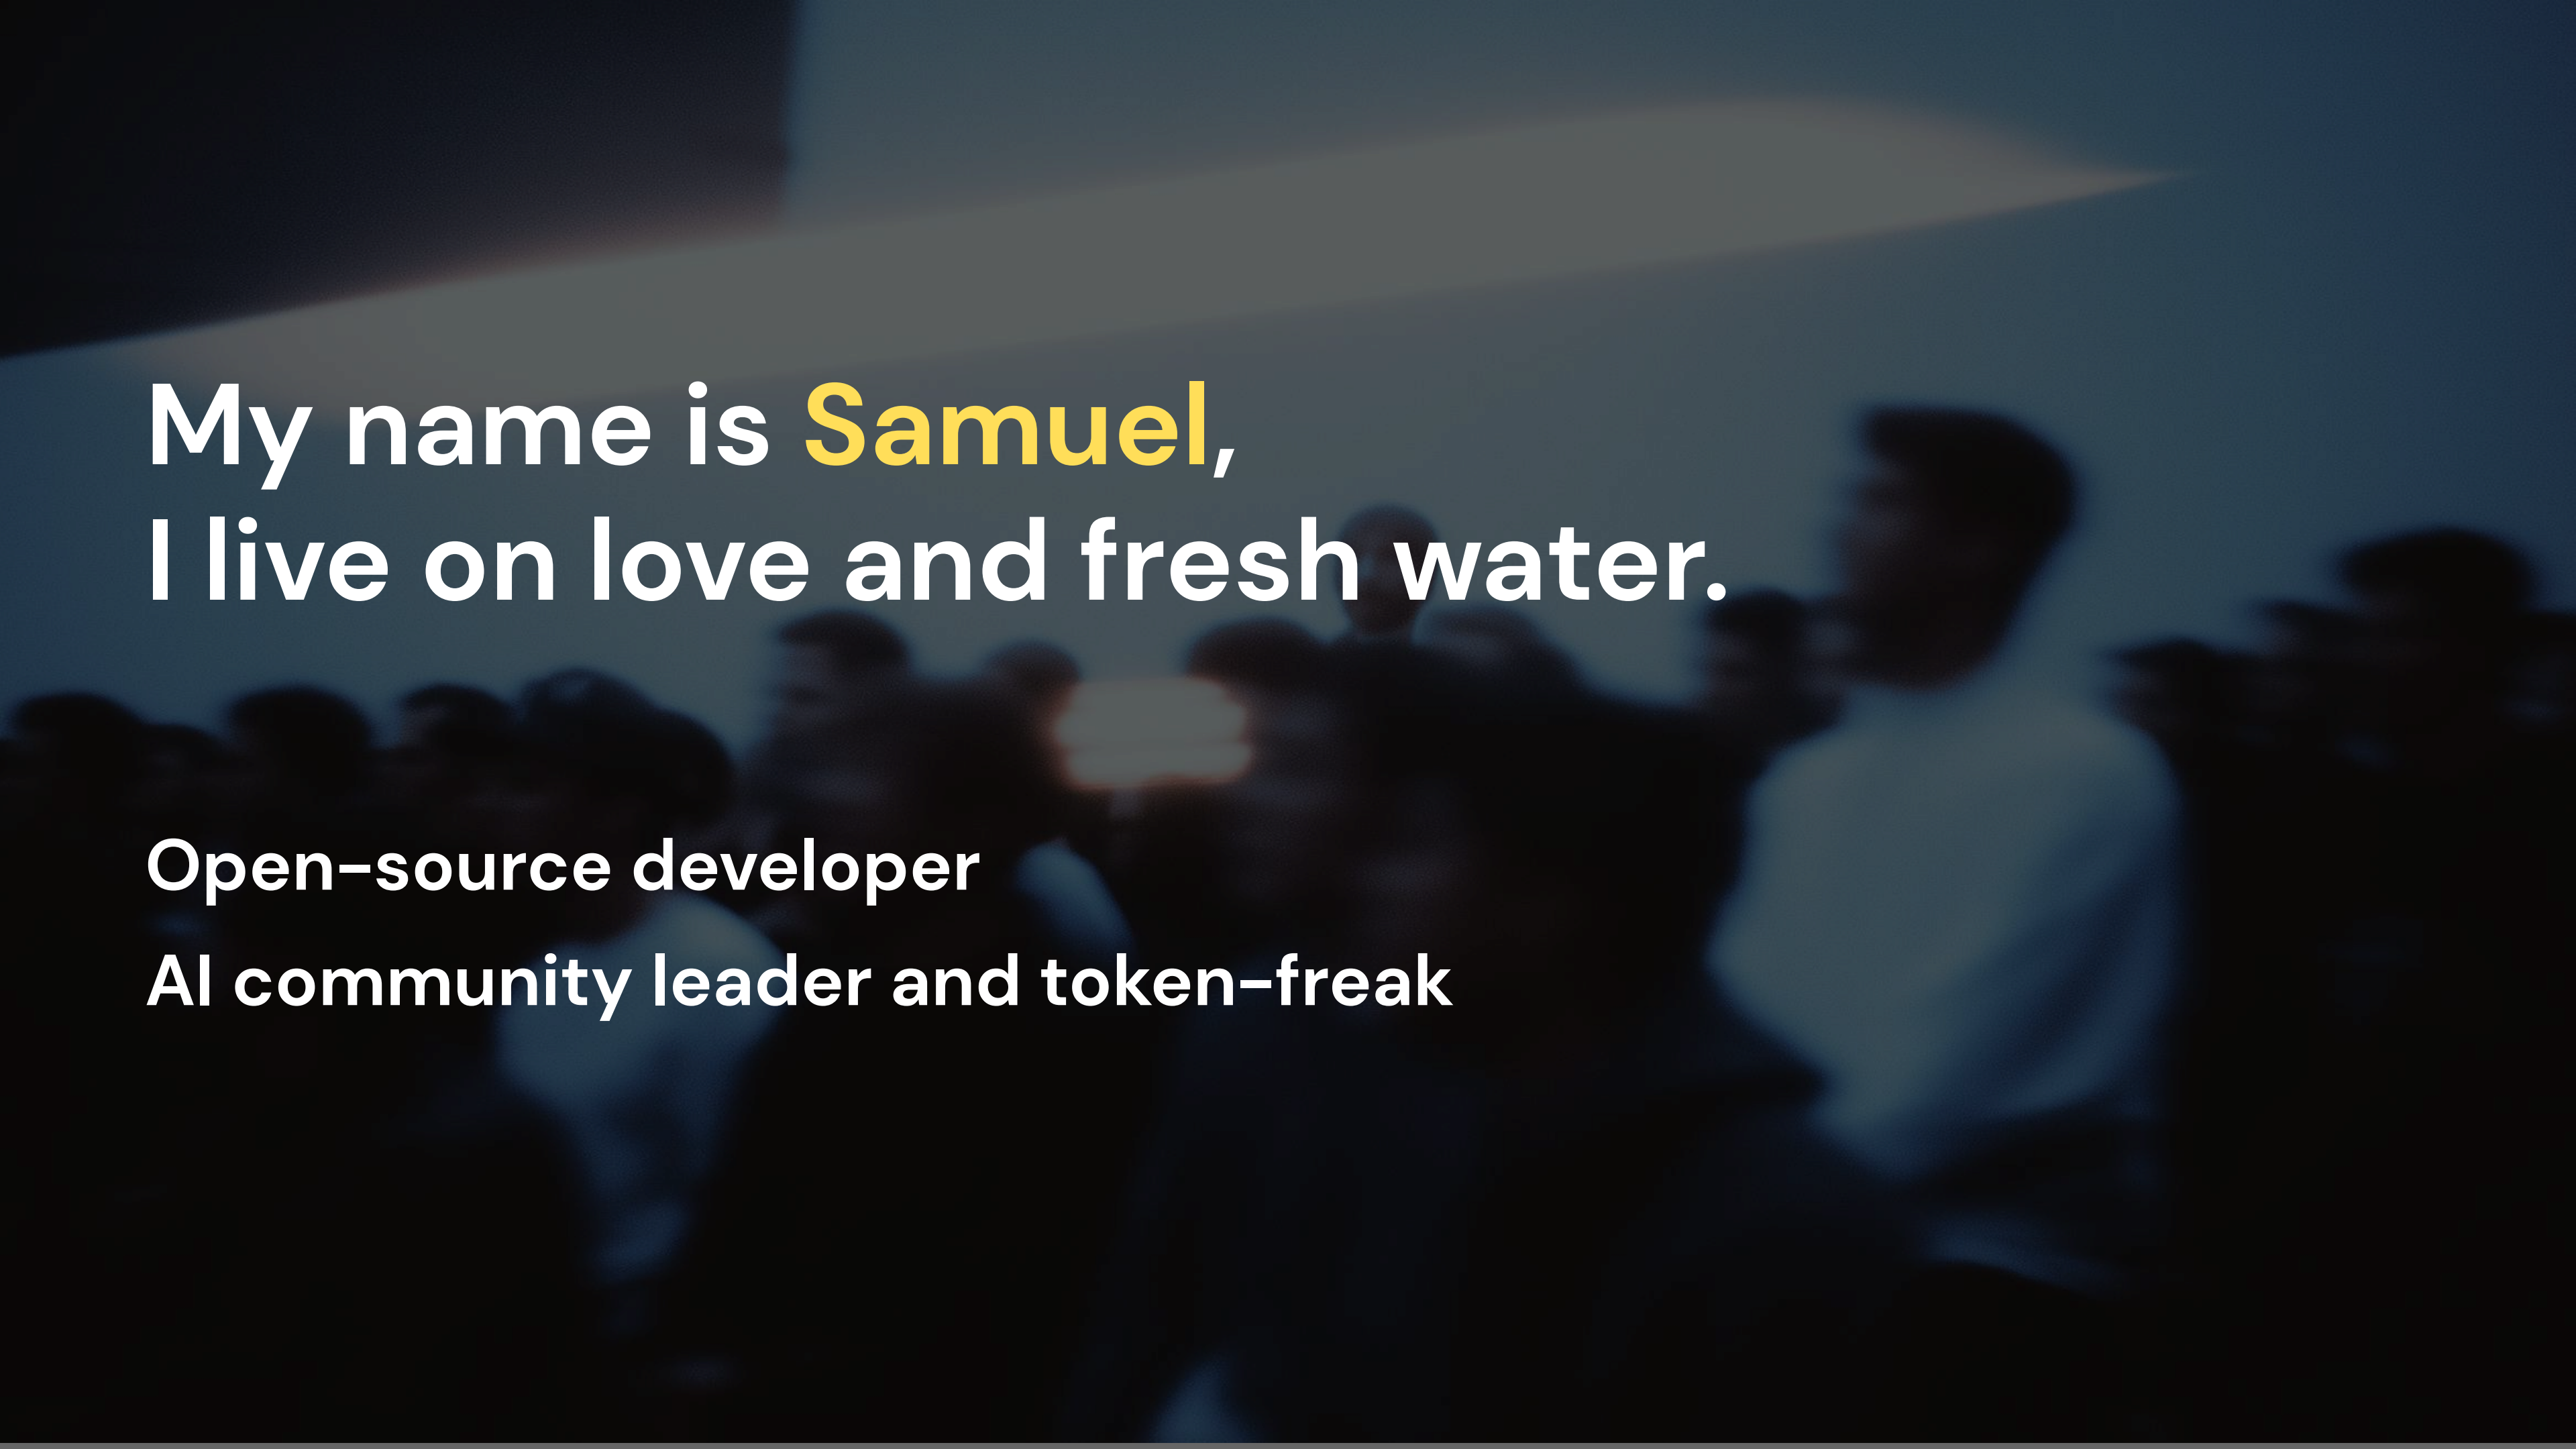

November 30, 2022

A blurred, dark blue-toned image of a city skyline at night, with lights from buildings and streets creating a bokeh effect. The text is centered over this background.

Release of ChatGPT
November 30, 2022

A blurred crowd of people in a dimly lit room, possibly a conference or event. A bright spotlight illuminates a section of the ceiling and the crowd below. The overall atmosphere is professional and modern.

Are you a AI-native worker ?

My name is **Samuel**,
I live on love and fresh water.

Open-source developer

AI community leader and token-freak

From Software Engineer to Agent Orchestrator

AI **agents** for...

...writing PRD, architecture, design

...**coding**, testing, debugging

...review, security checks, QA

This is the new **state of the art**.

So, what next ?

Proactive agents

Scheduling or react to external events.

Self-learning

Feedback loop – LLM as judge

Code, test, fix, repeat

Cost of **security** attacks is close to **zero**

Malicious actors have more resources than you do.

Popular tech **stacks** quietly win

Loss of diversity. Decline in open-source.
Edge is handicap.

Code quality is not a thing anymore

Machines write code for themselves.

Code is a blackbox.

Pet vs cattle

Does HR **recruit** Java developers
or just... developers ?

Programming *languages* **were** for humans

IA will go native.

The background is a dark, blurred photograph of a bridge at night. The bridge's structure, including its towers and cables, is visible but out of focus. The lighting is dim, with some light trails from vehicles on the bridge deck. The overall tone is dark and moody.

My **jobs** in the past 6 months:

A blurred photograph of a person walking through a modern, brightly lit interior space, possibly a hallway or a large room with a high ceiling. The person is in the center, moving from left to right, and their figure is out of focus. The background shows architectural details like ceiling lights and walls, also blurred to convey a sense of motion. The overall color palette is cool, with blues and greys, and the lighting is soft and diffused.

Designer

A blurred night scene of a city street. In the background, a car with its headlights on is driving. To the right, a person is walking, their figure also blurred. The scene is reflected in a body of water in the foreground. The overall tone is dark and moody.

Copywriter

Social media manager

Sales

The background is a blurred photograph of a winter scene. It shows a snow-covered mountain range in the distance, a small village with white buildings and dark roofs in the middle ground, and a calm lake in the foreground reflecting the scene. The overall tone is cool and serene, with a soft focus effect.

Product manager

Developer Advocate

The background is a dark, blurred photograph of a person sitting at a desk, working on a computer. The person is seen from the side, looking at a large monitor. There are other monitors visible in the background, creating a sense of a professional workspace. The overall tone is dark and moody, with the text 'Data analyst' standing out in white.

Data analyst

and ...developer

Delegating to AI gives me **superpowers**

If the AI is the expert, then workers must be flexible and versatile.

Economy 101: Comparative **advantage** (Ricardo)

Job market and unfair advantages

Junior vs senior workers.
Producing has **no more value.**

Study the big picture

AI works best when it has a
clear **method** to follow.

Train your problem solving and teach the method.
The why.

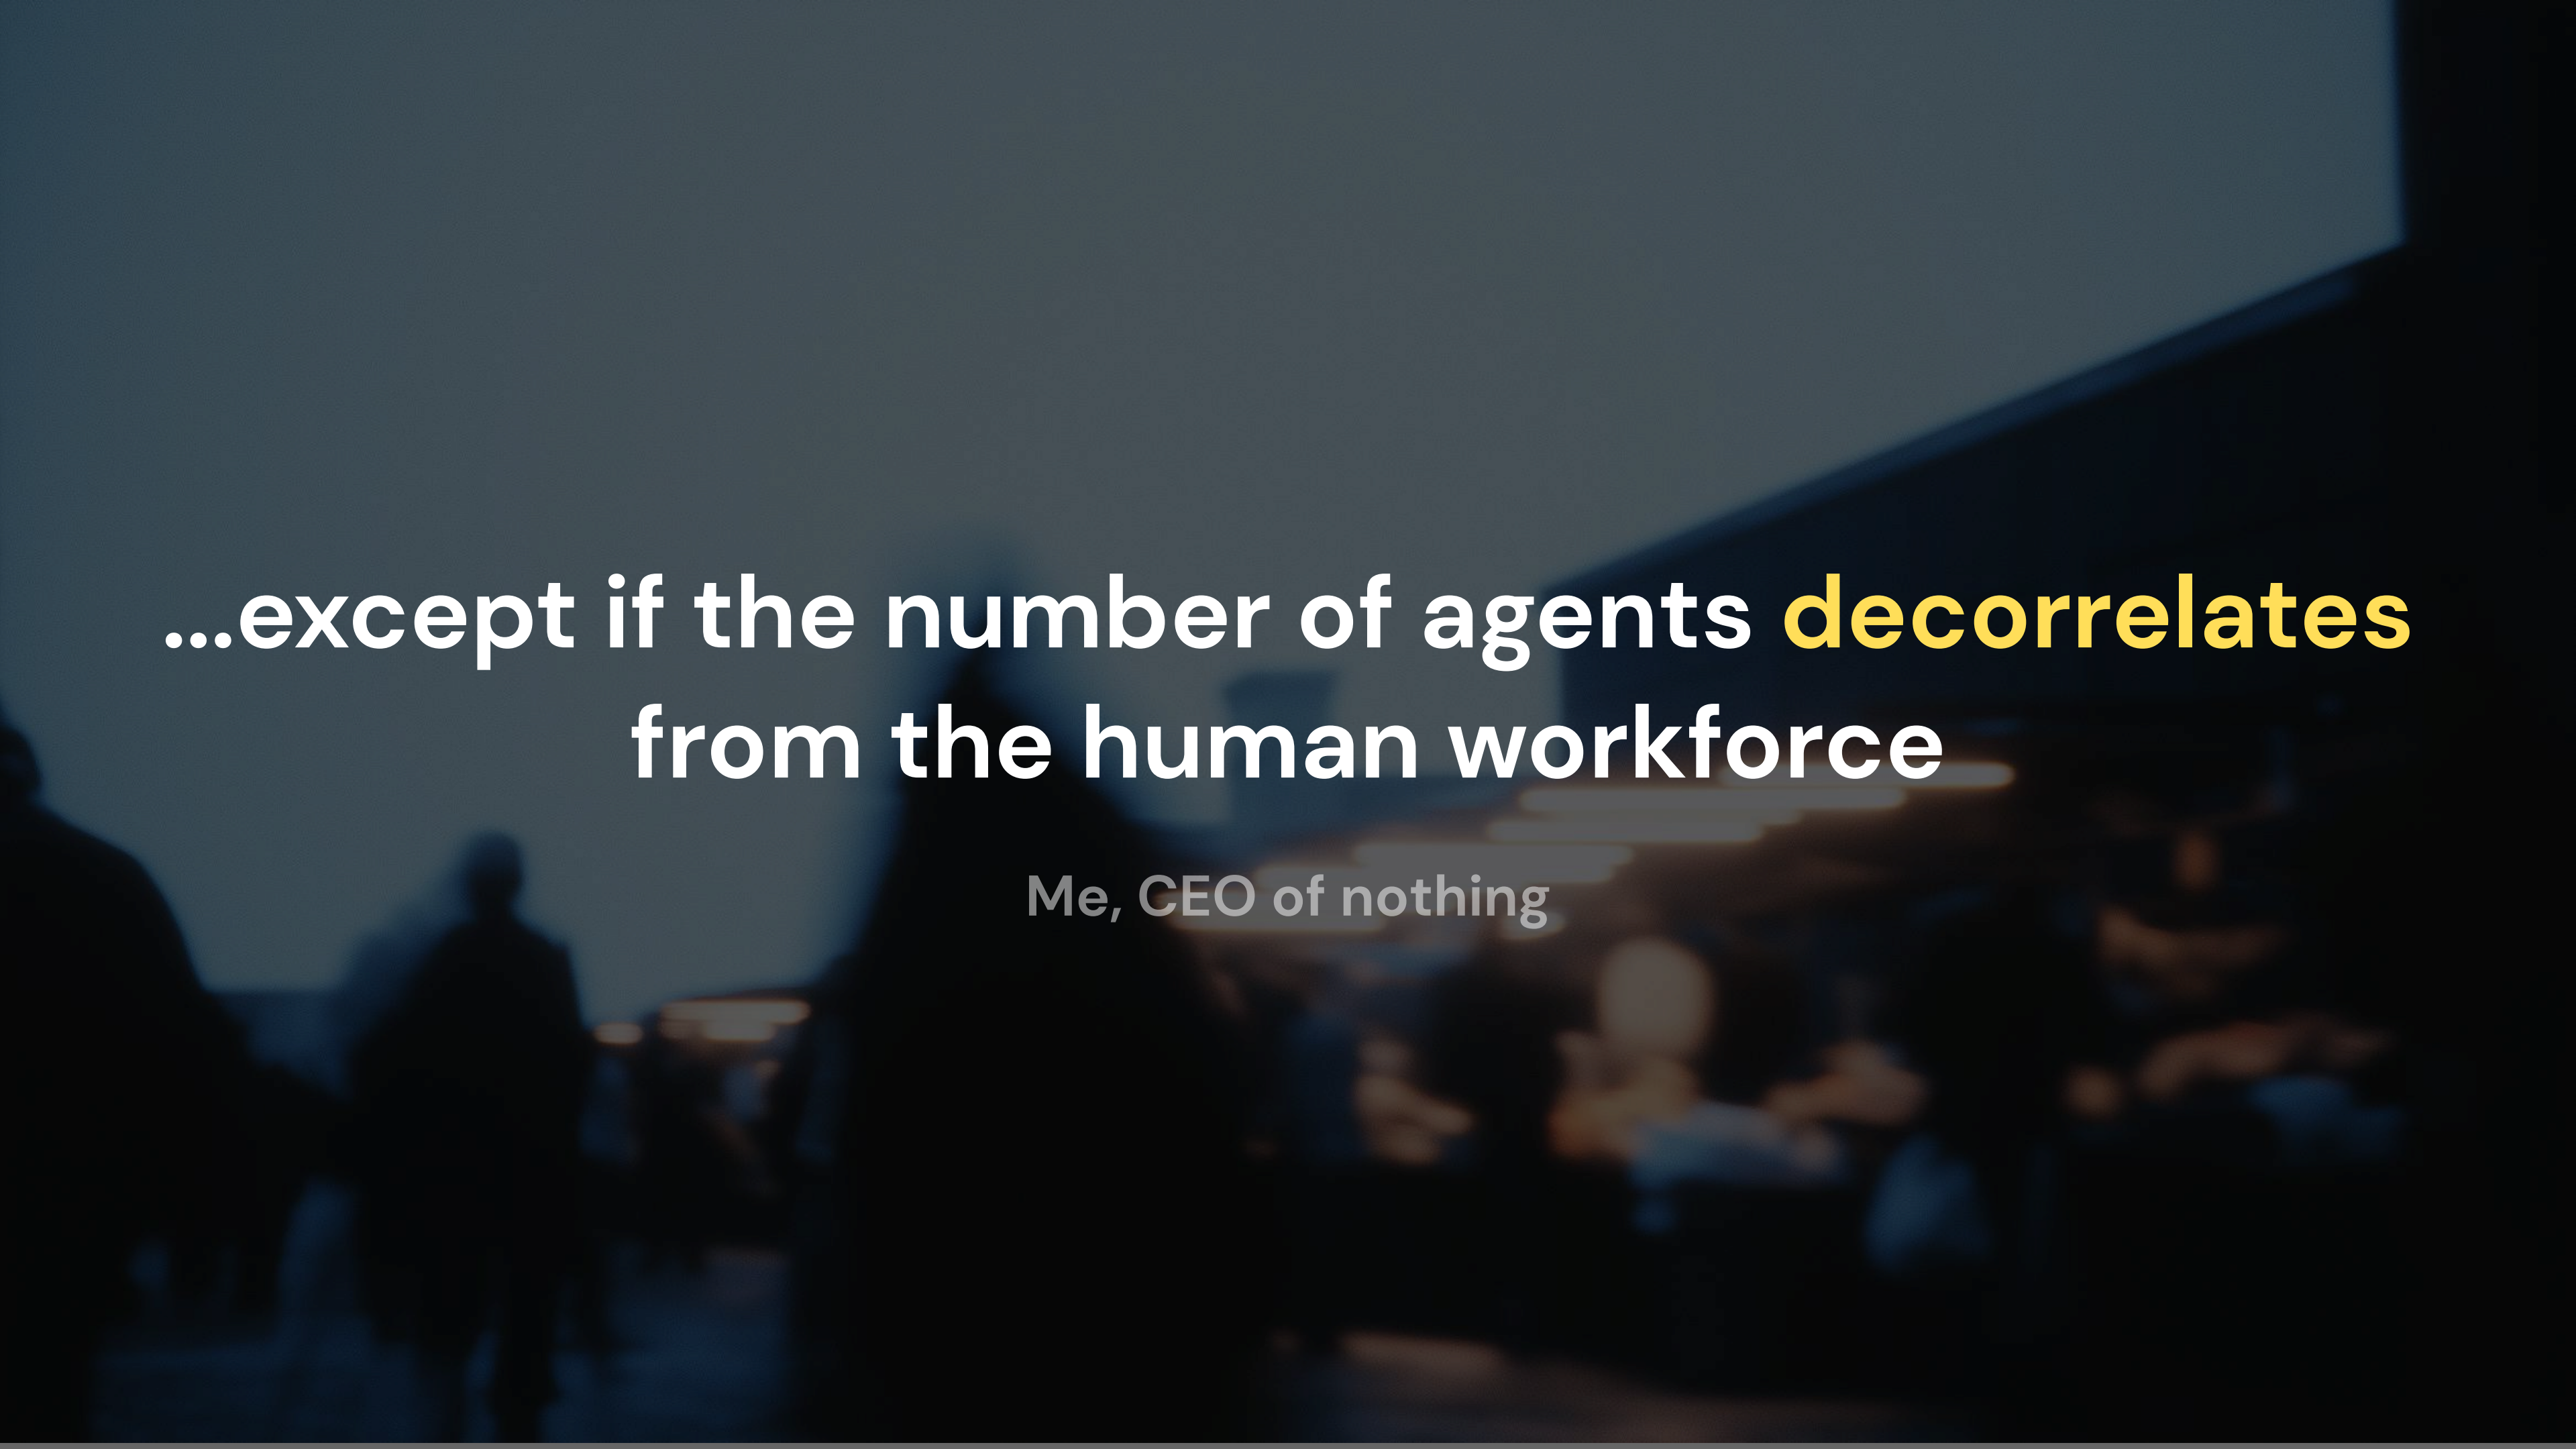

AI always go to the **average**

Be creative.

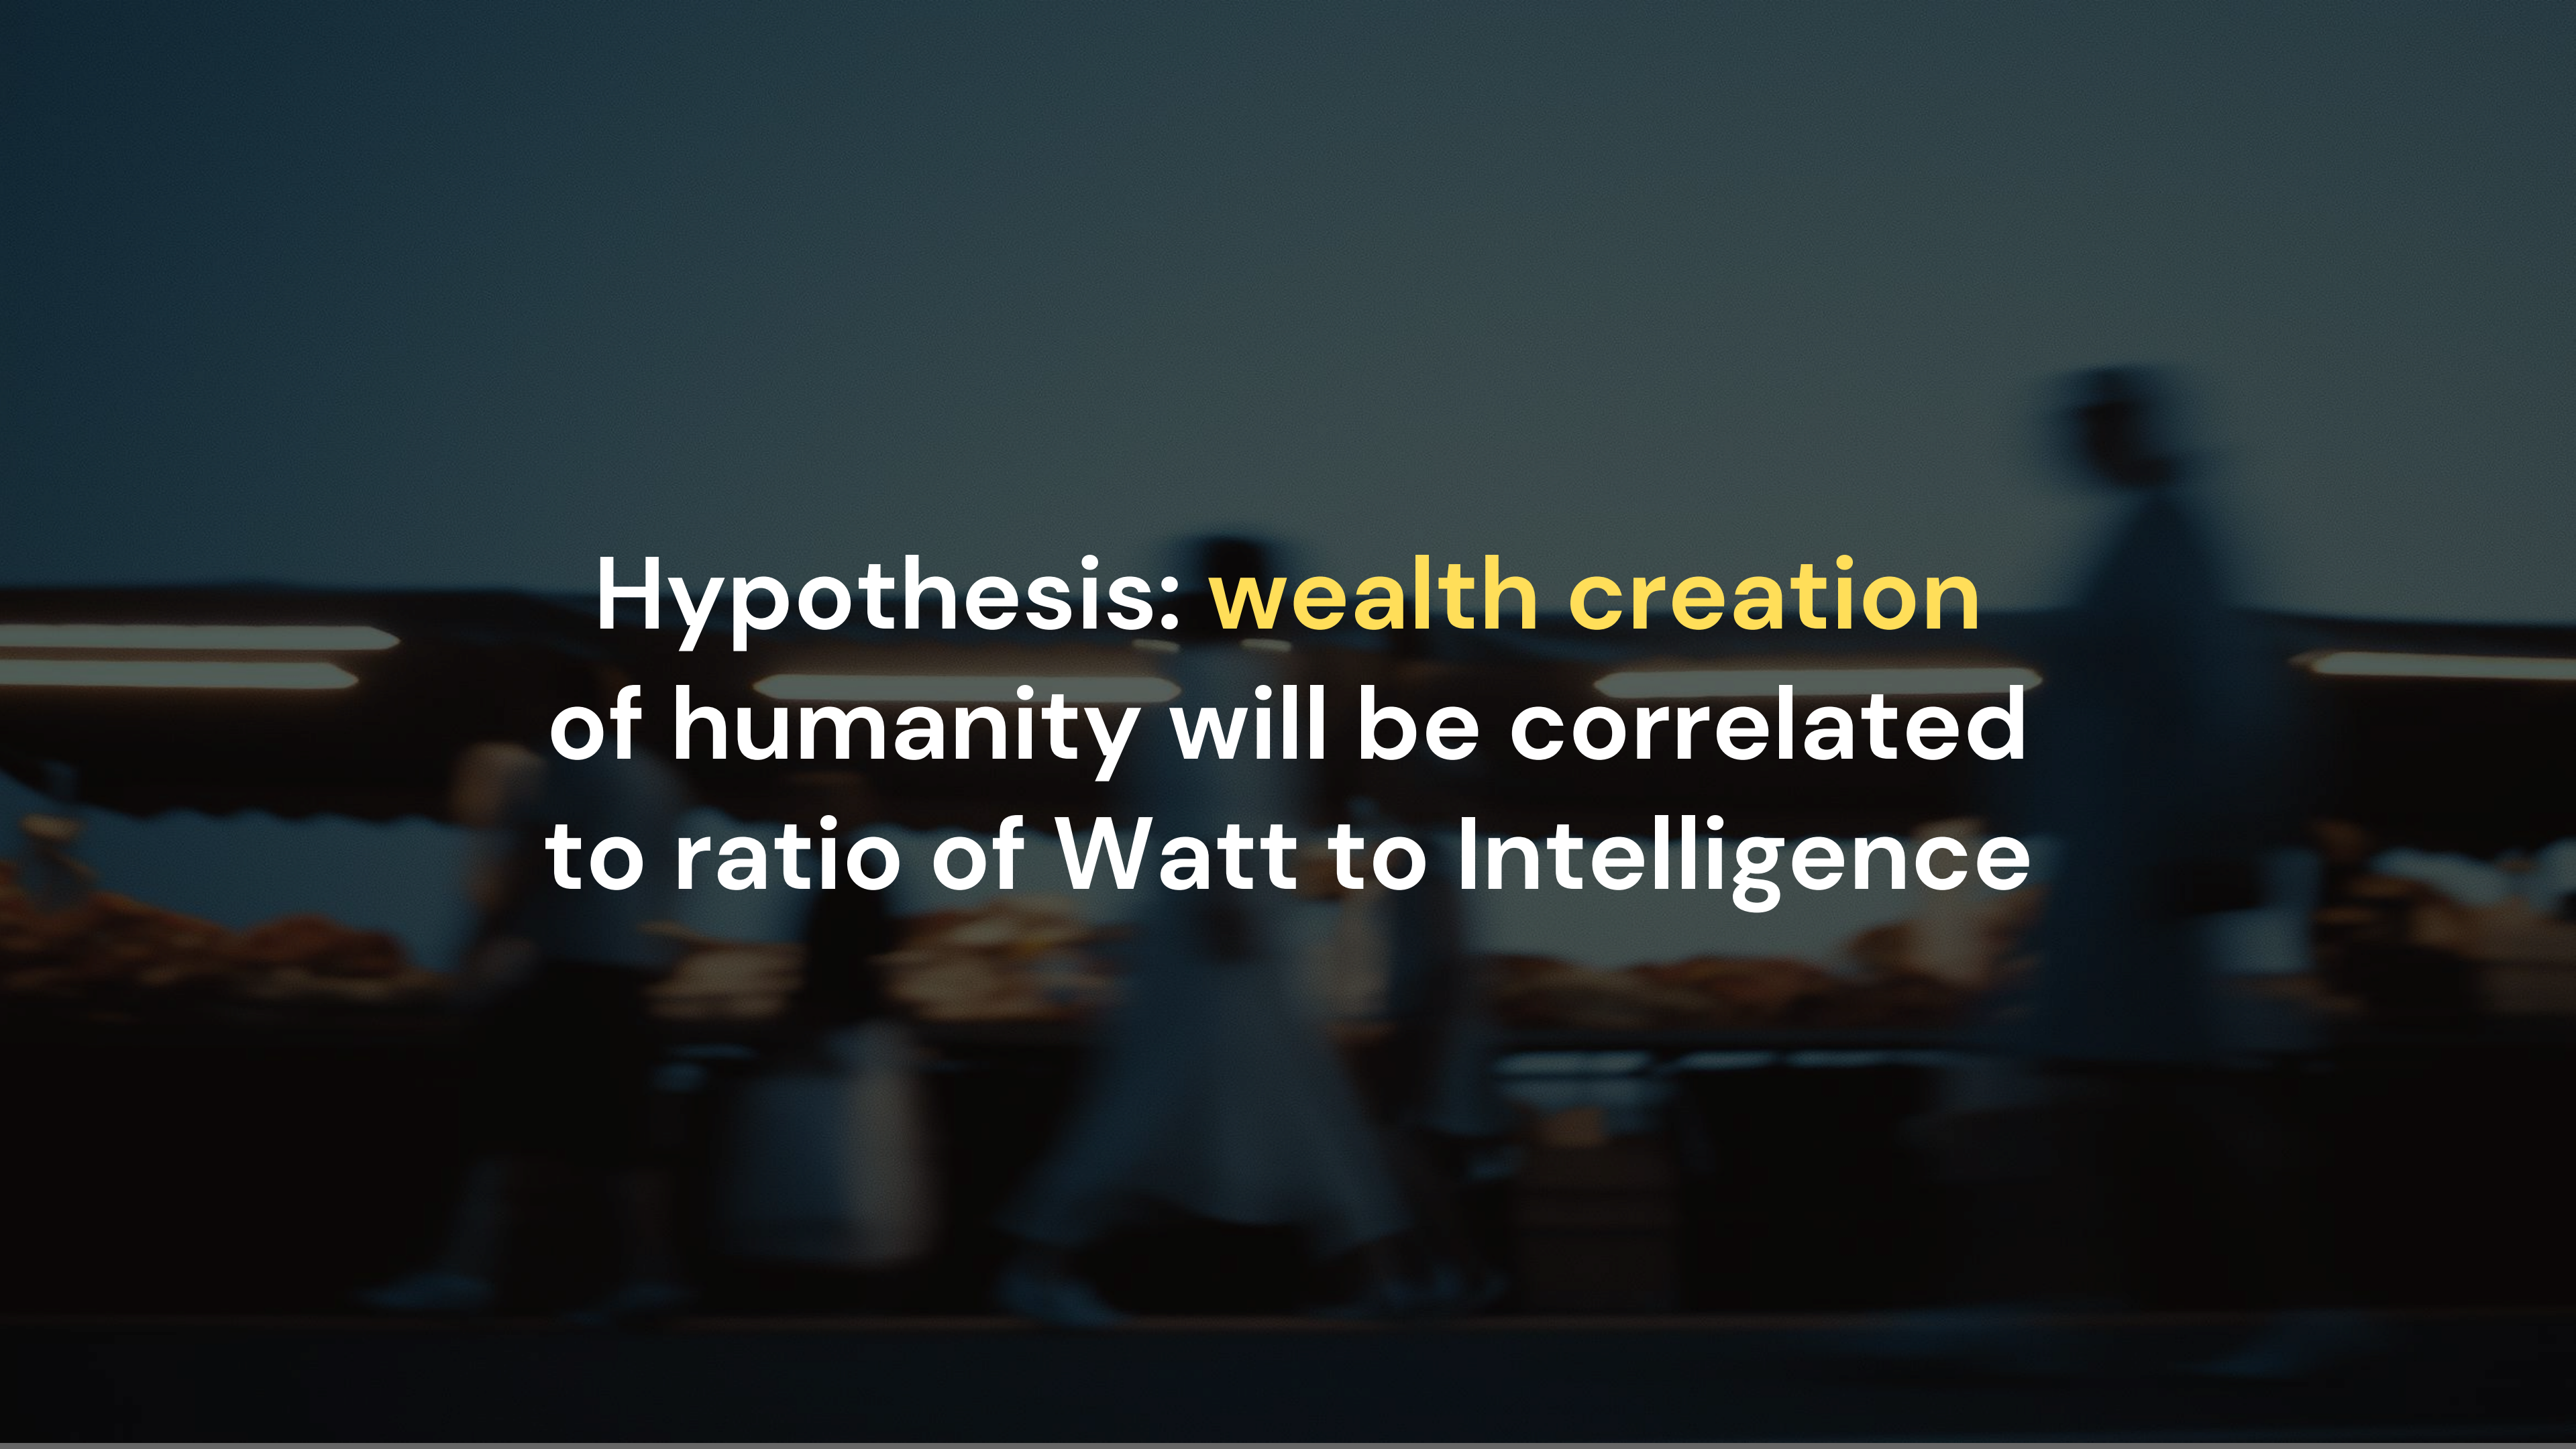

“Companies will spend
10% of salary base into AI”

Arthur Mensch, CEO of Mistral

A blurred background image of an office interior. Several people are visible, mostly in silhouette or out of focus, working at desks with computer monitors. The lighting is dim, suggesting an evening or late afternoon setting. The overall tone is professional and somewhat somber.

...except if the number of agents **decorrelates**
from the human workforce

Me, CEO of nothing

The background is a dark, blurred image of a group of people in a meeting or conference room. They are seated around a table, and some are looking towards the camera while others are looking down. The lighting is dim, with some light sources visible in the background.

Hypothesis: **wealth creation**
of humanity will be correlated
to ratio of Watt to Intelligence

AlphaFold

Accelerating breakthroughs in biology with AI

OpenAI claims it solved an 80-year-old math problem

Rebecca Bellan — 1:28 PM PDT · May 20, 2026

When ?
How **fast** ?

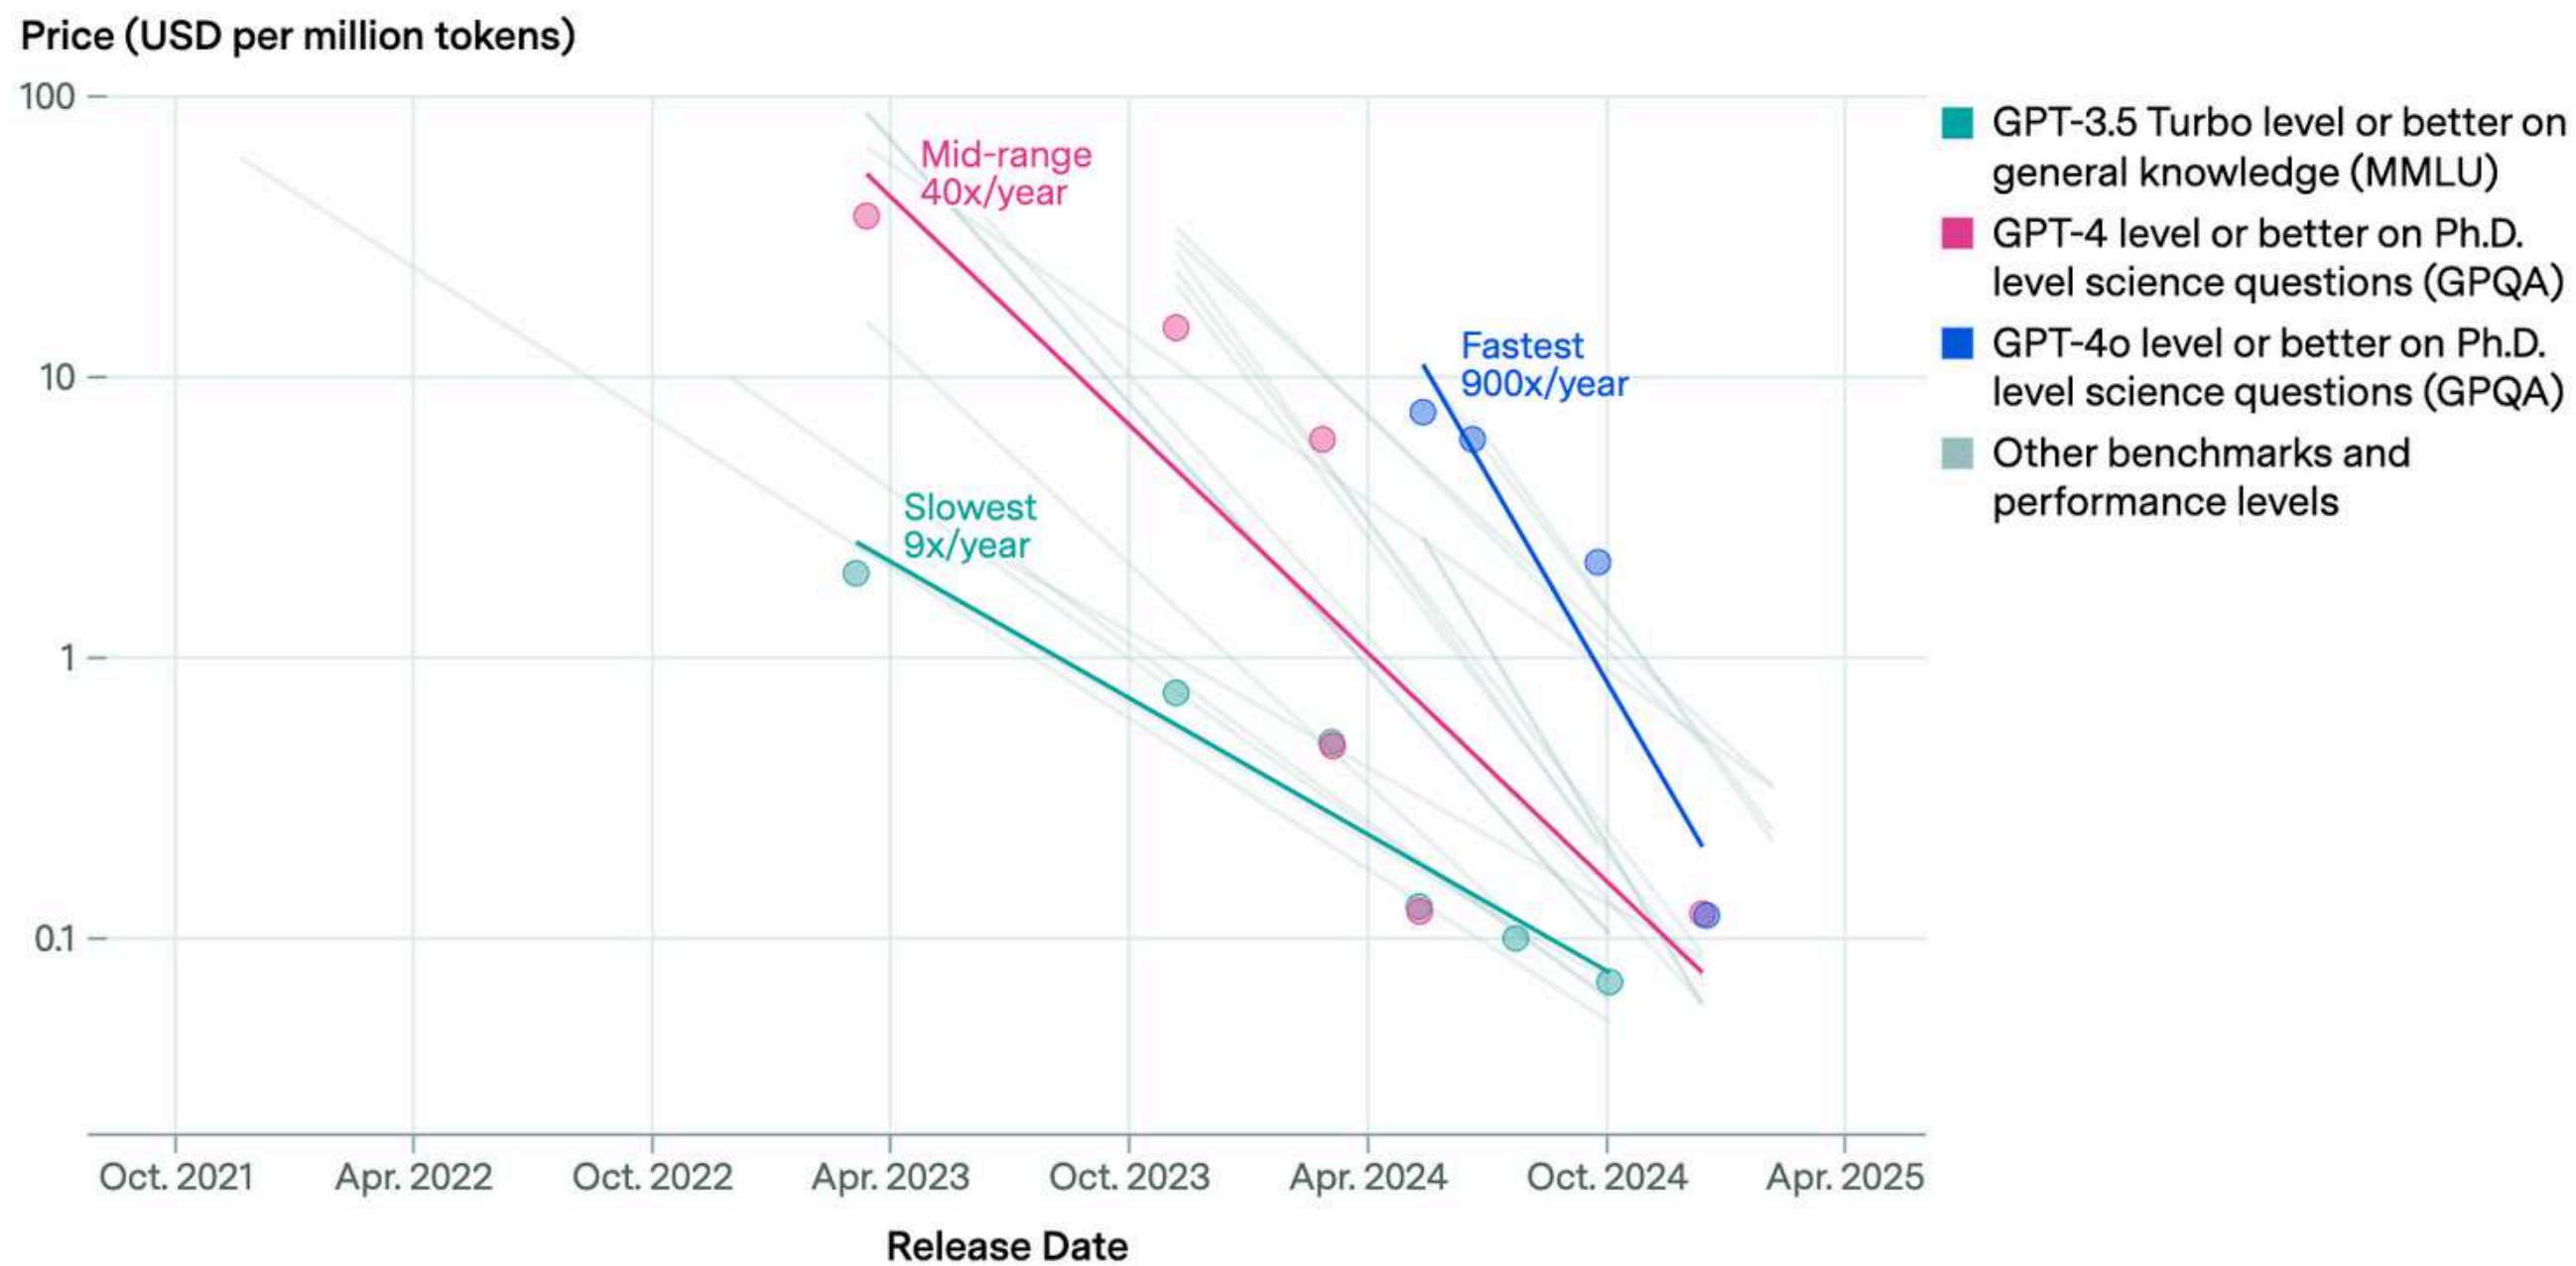

Exponential growth

Semiconductor – Flop/s per watt: +40% / year

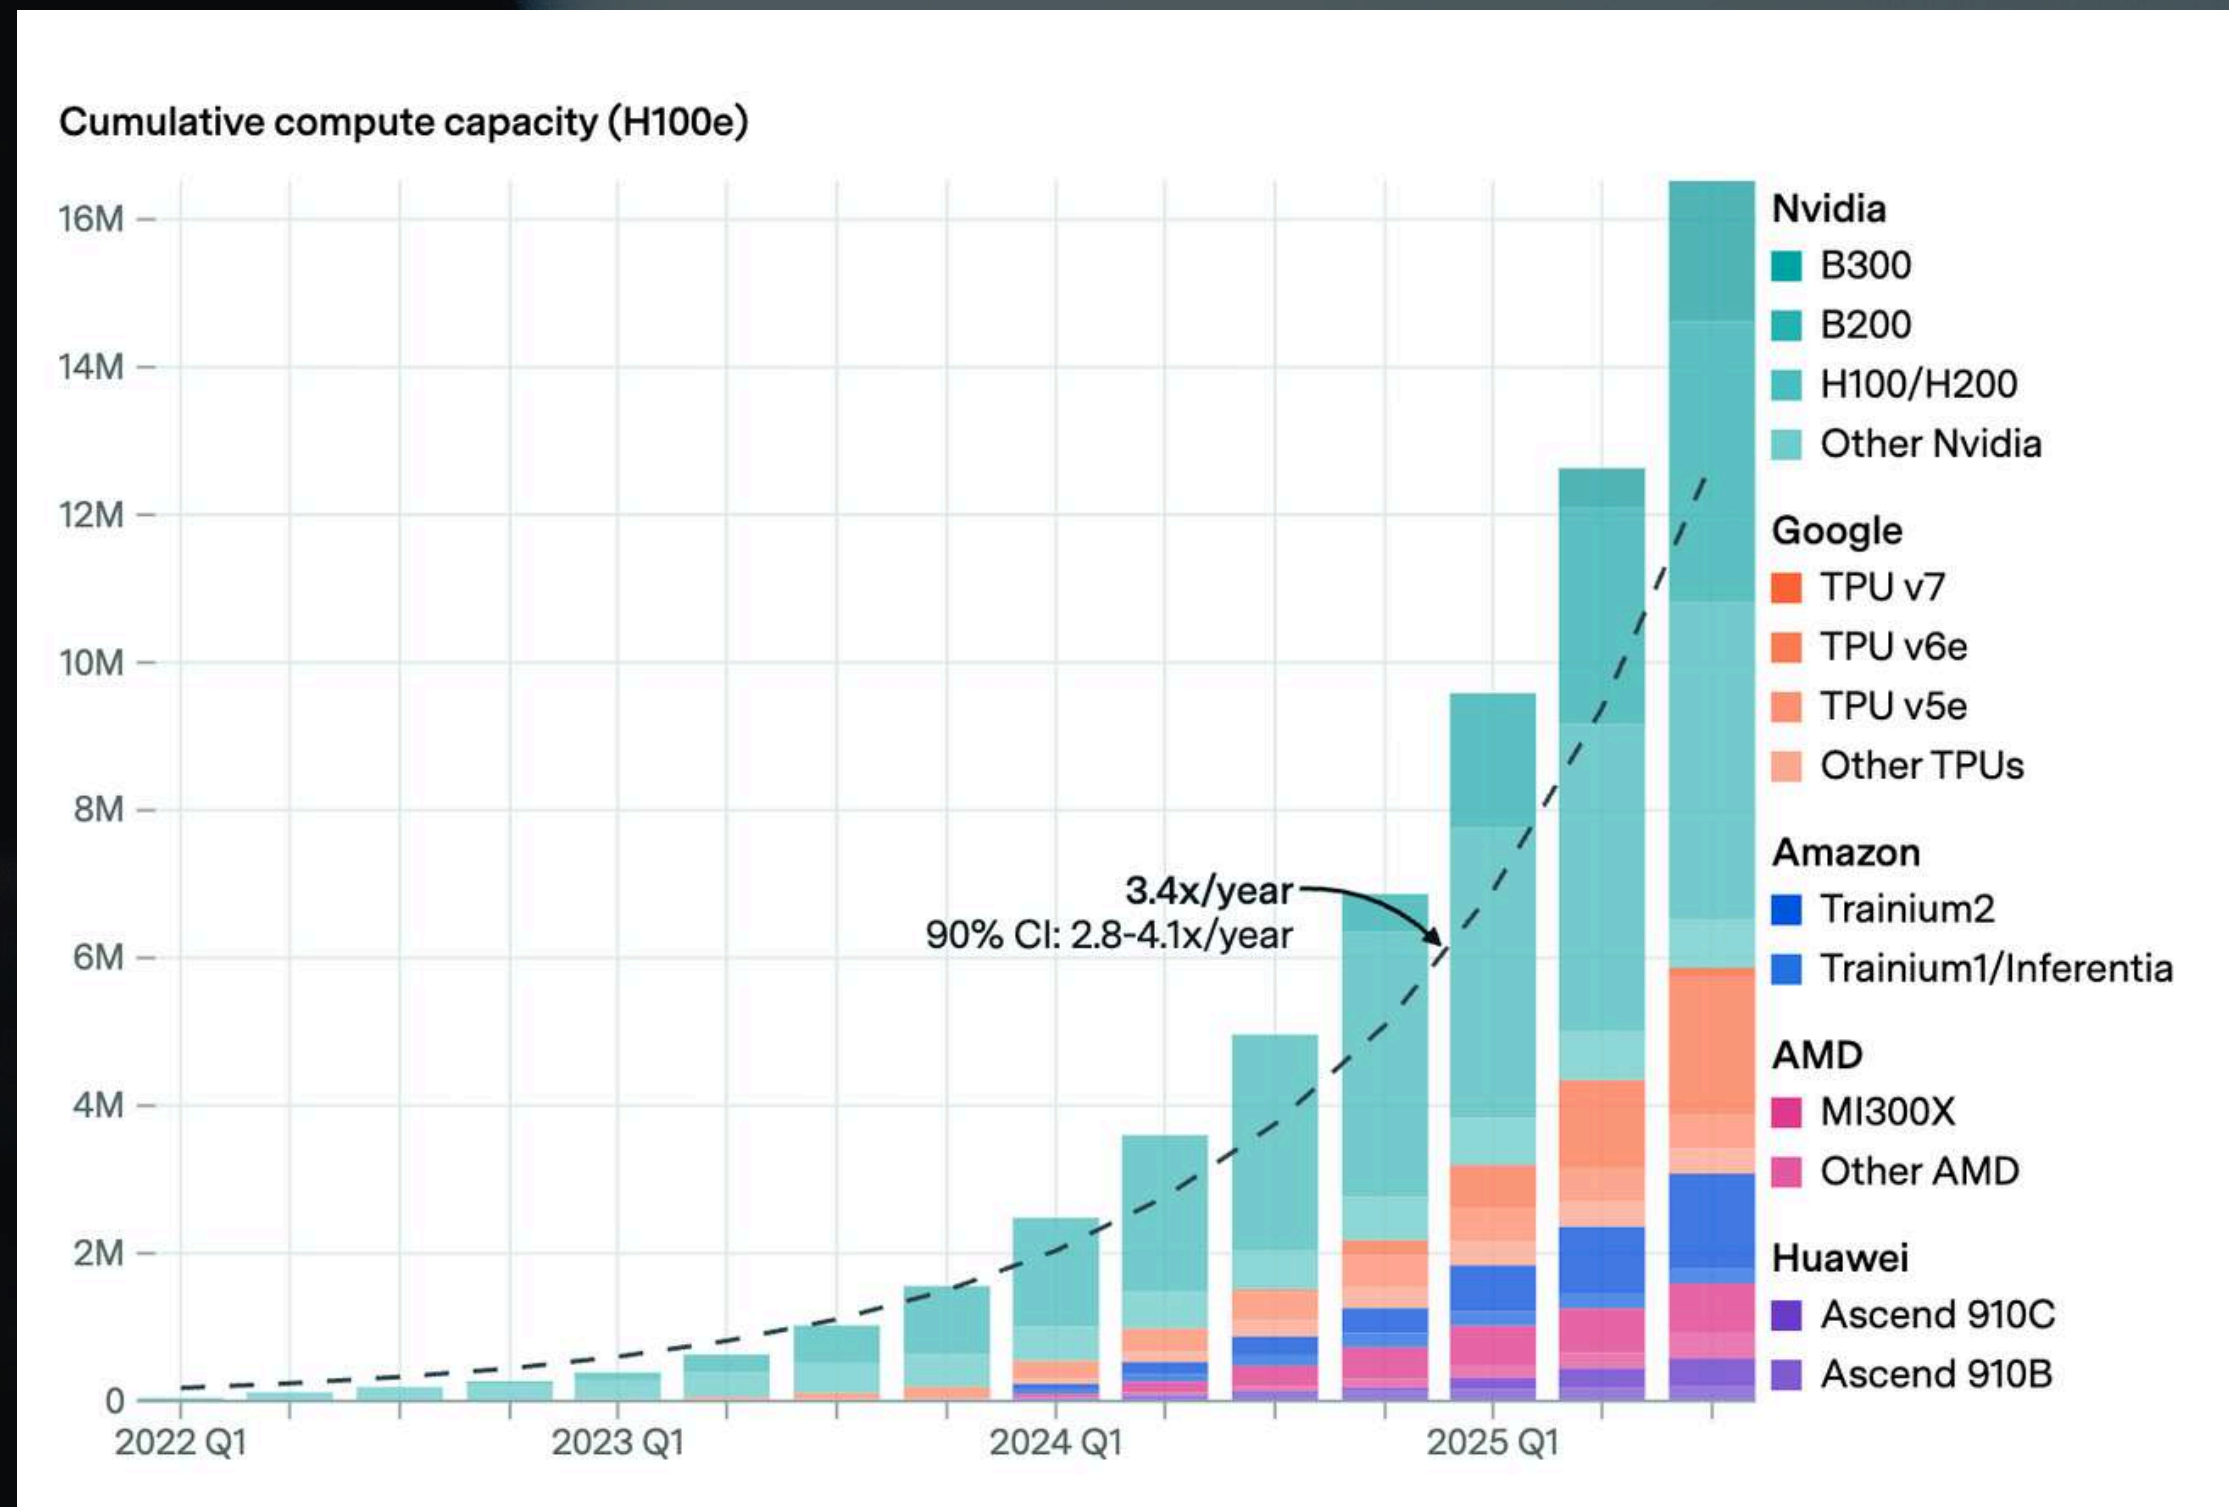

Cost of intelligence:

↘ 40x/year

Data source: Epoch AI, [Artificial Analysis](#)

Compute capacity doubling time: 6.8 months

Conclusion

Because this talk is getting too long. Sorry.

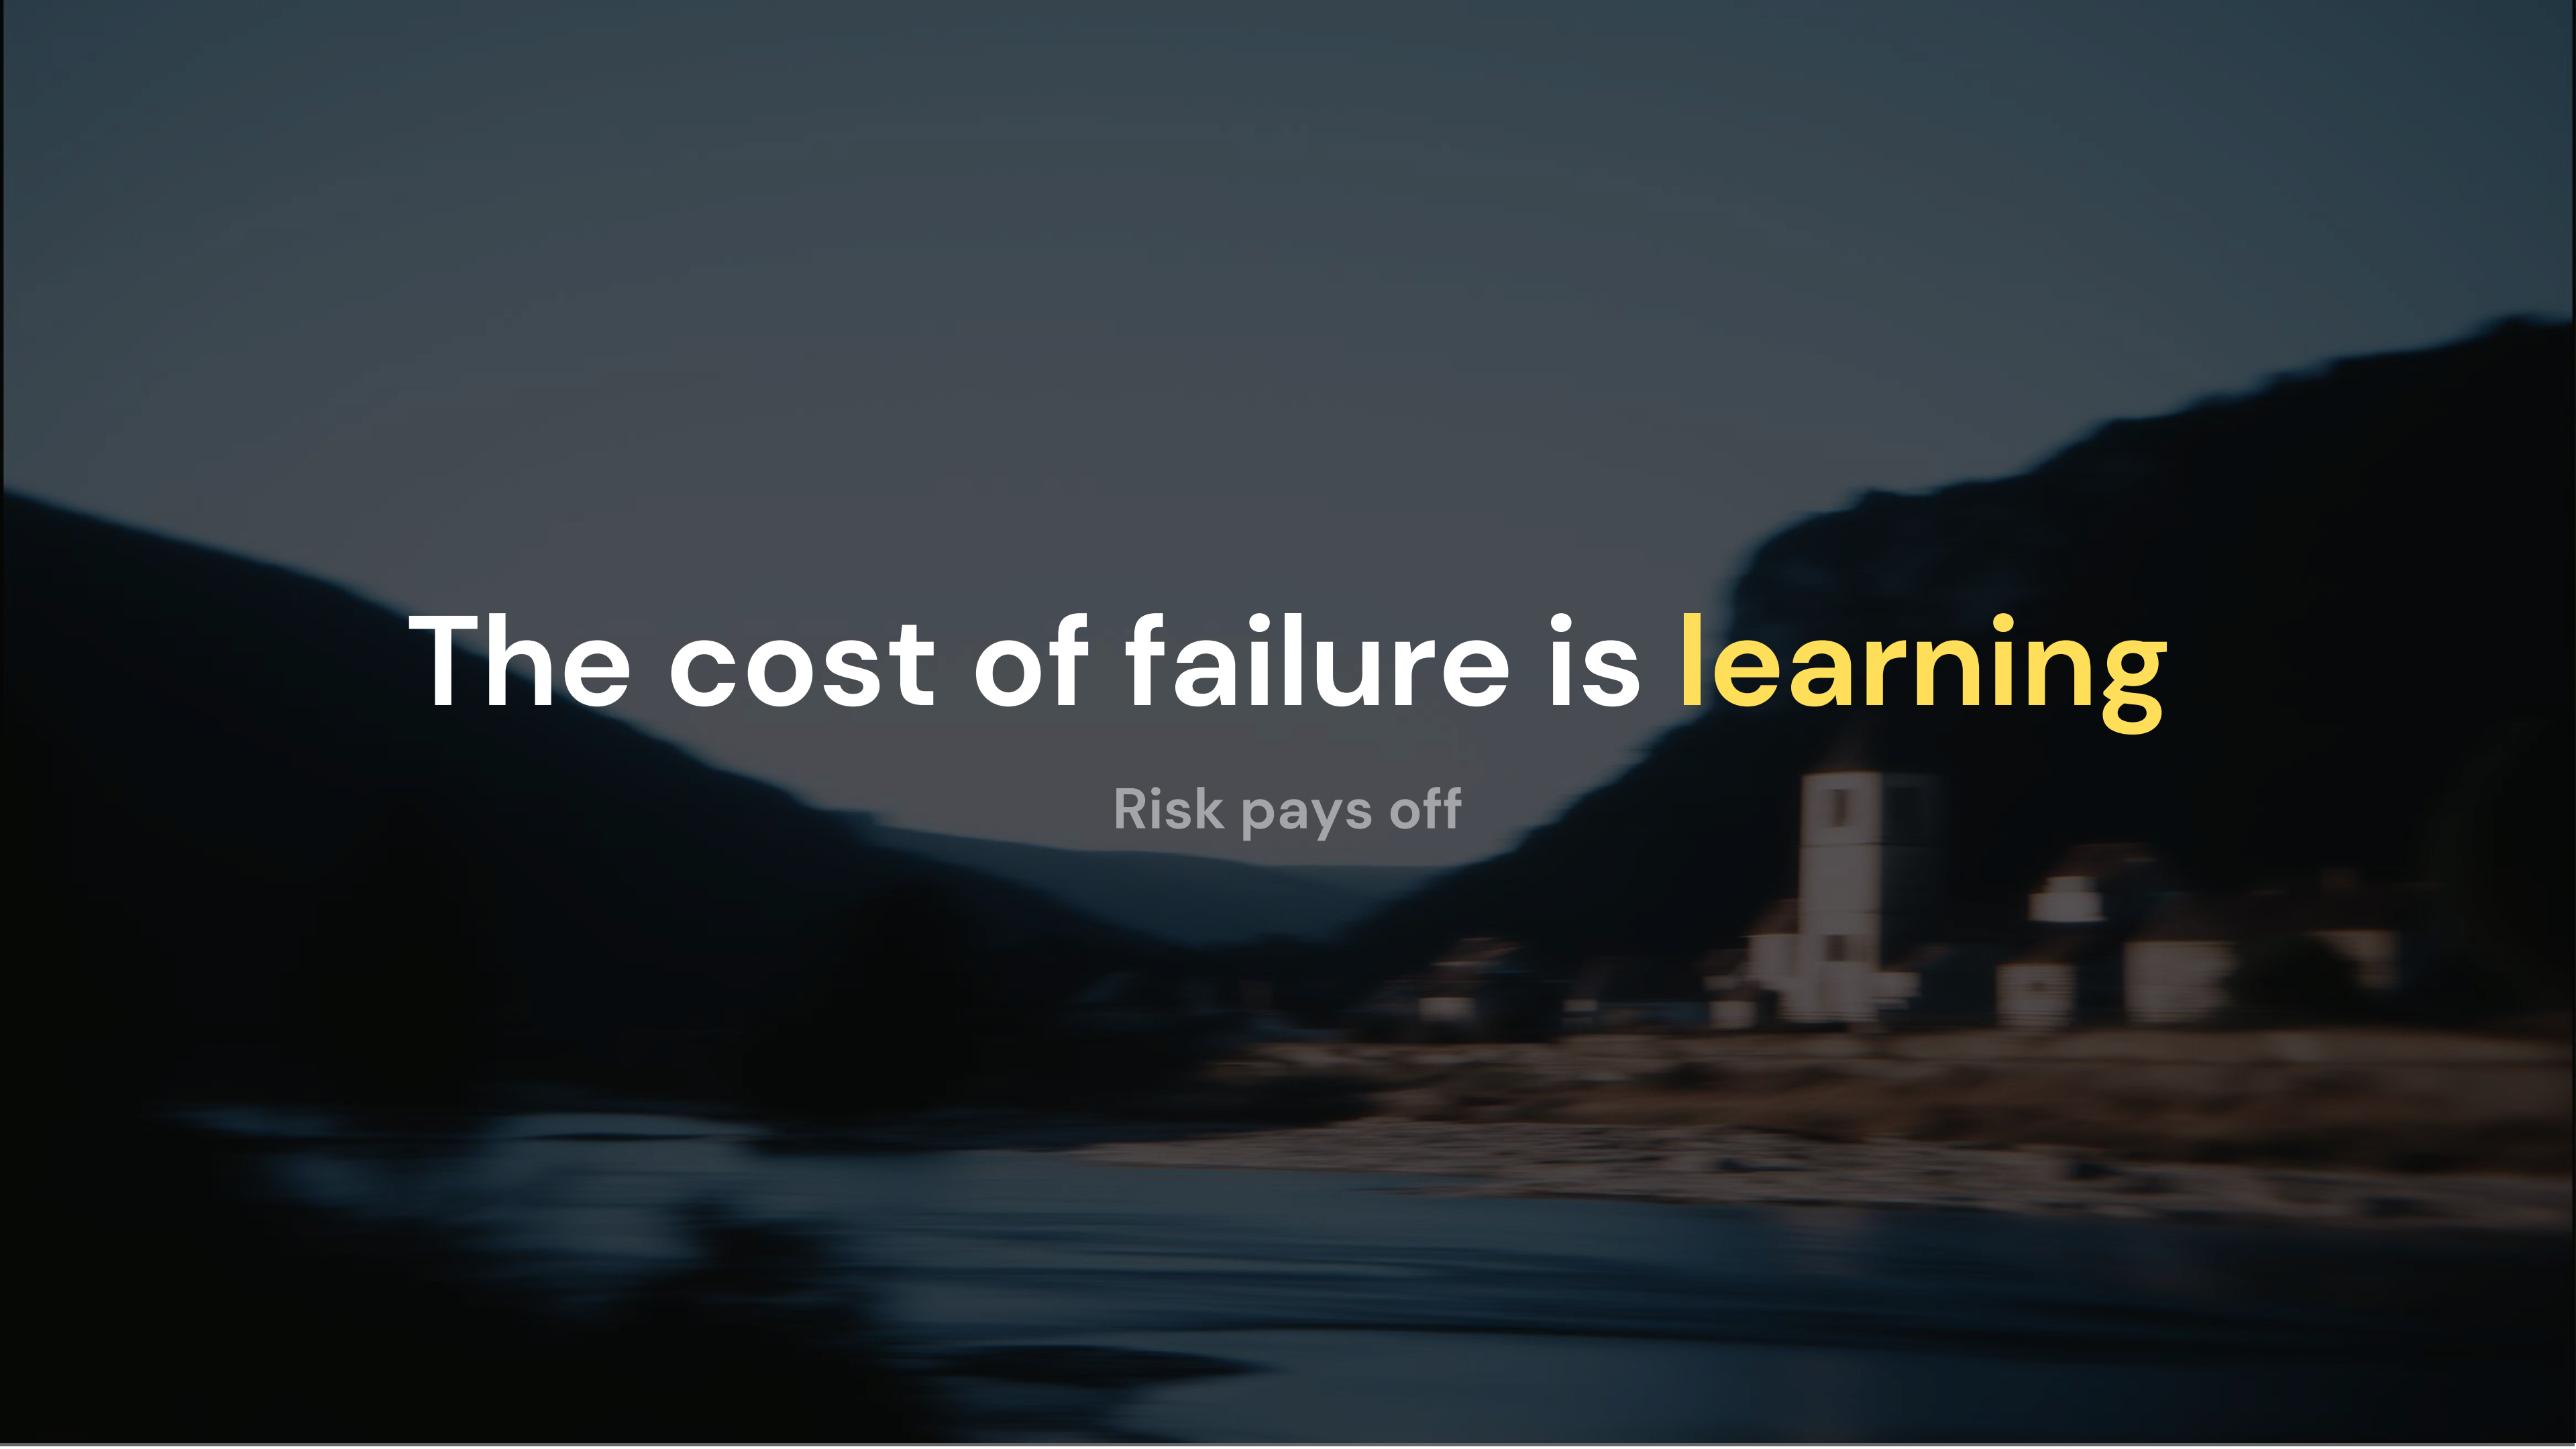

Creative destruction

Joseph Schumpeter, Philippe Aghion

A blurred background image of a person sitting on a couch, reading a book. The person is in the center, slightly to the right, with their back to the camera. The couch is dark, and the background is a soft, out-of-focus interior space with warm lighting. The overall mood is calm and relaxed.

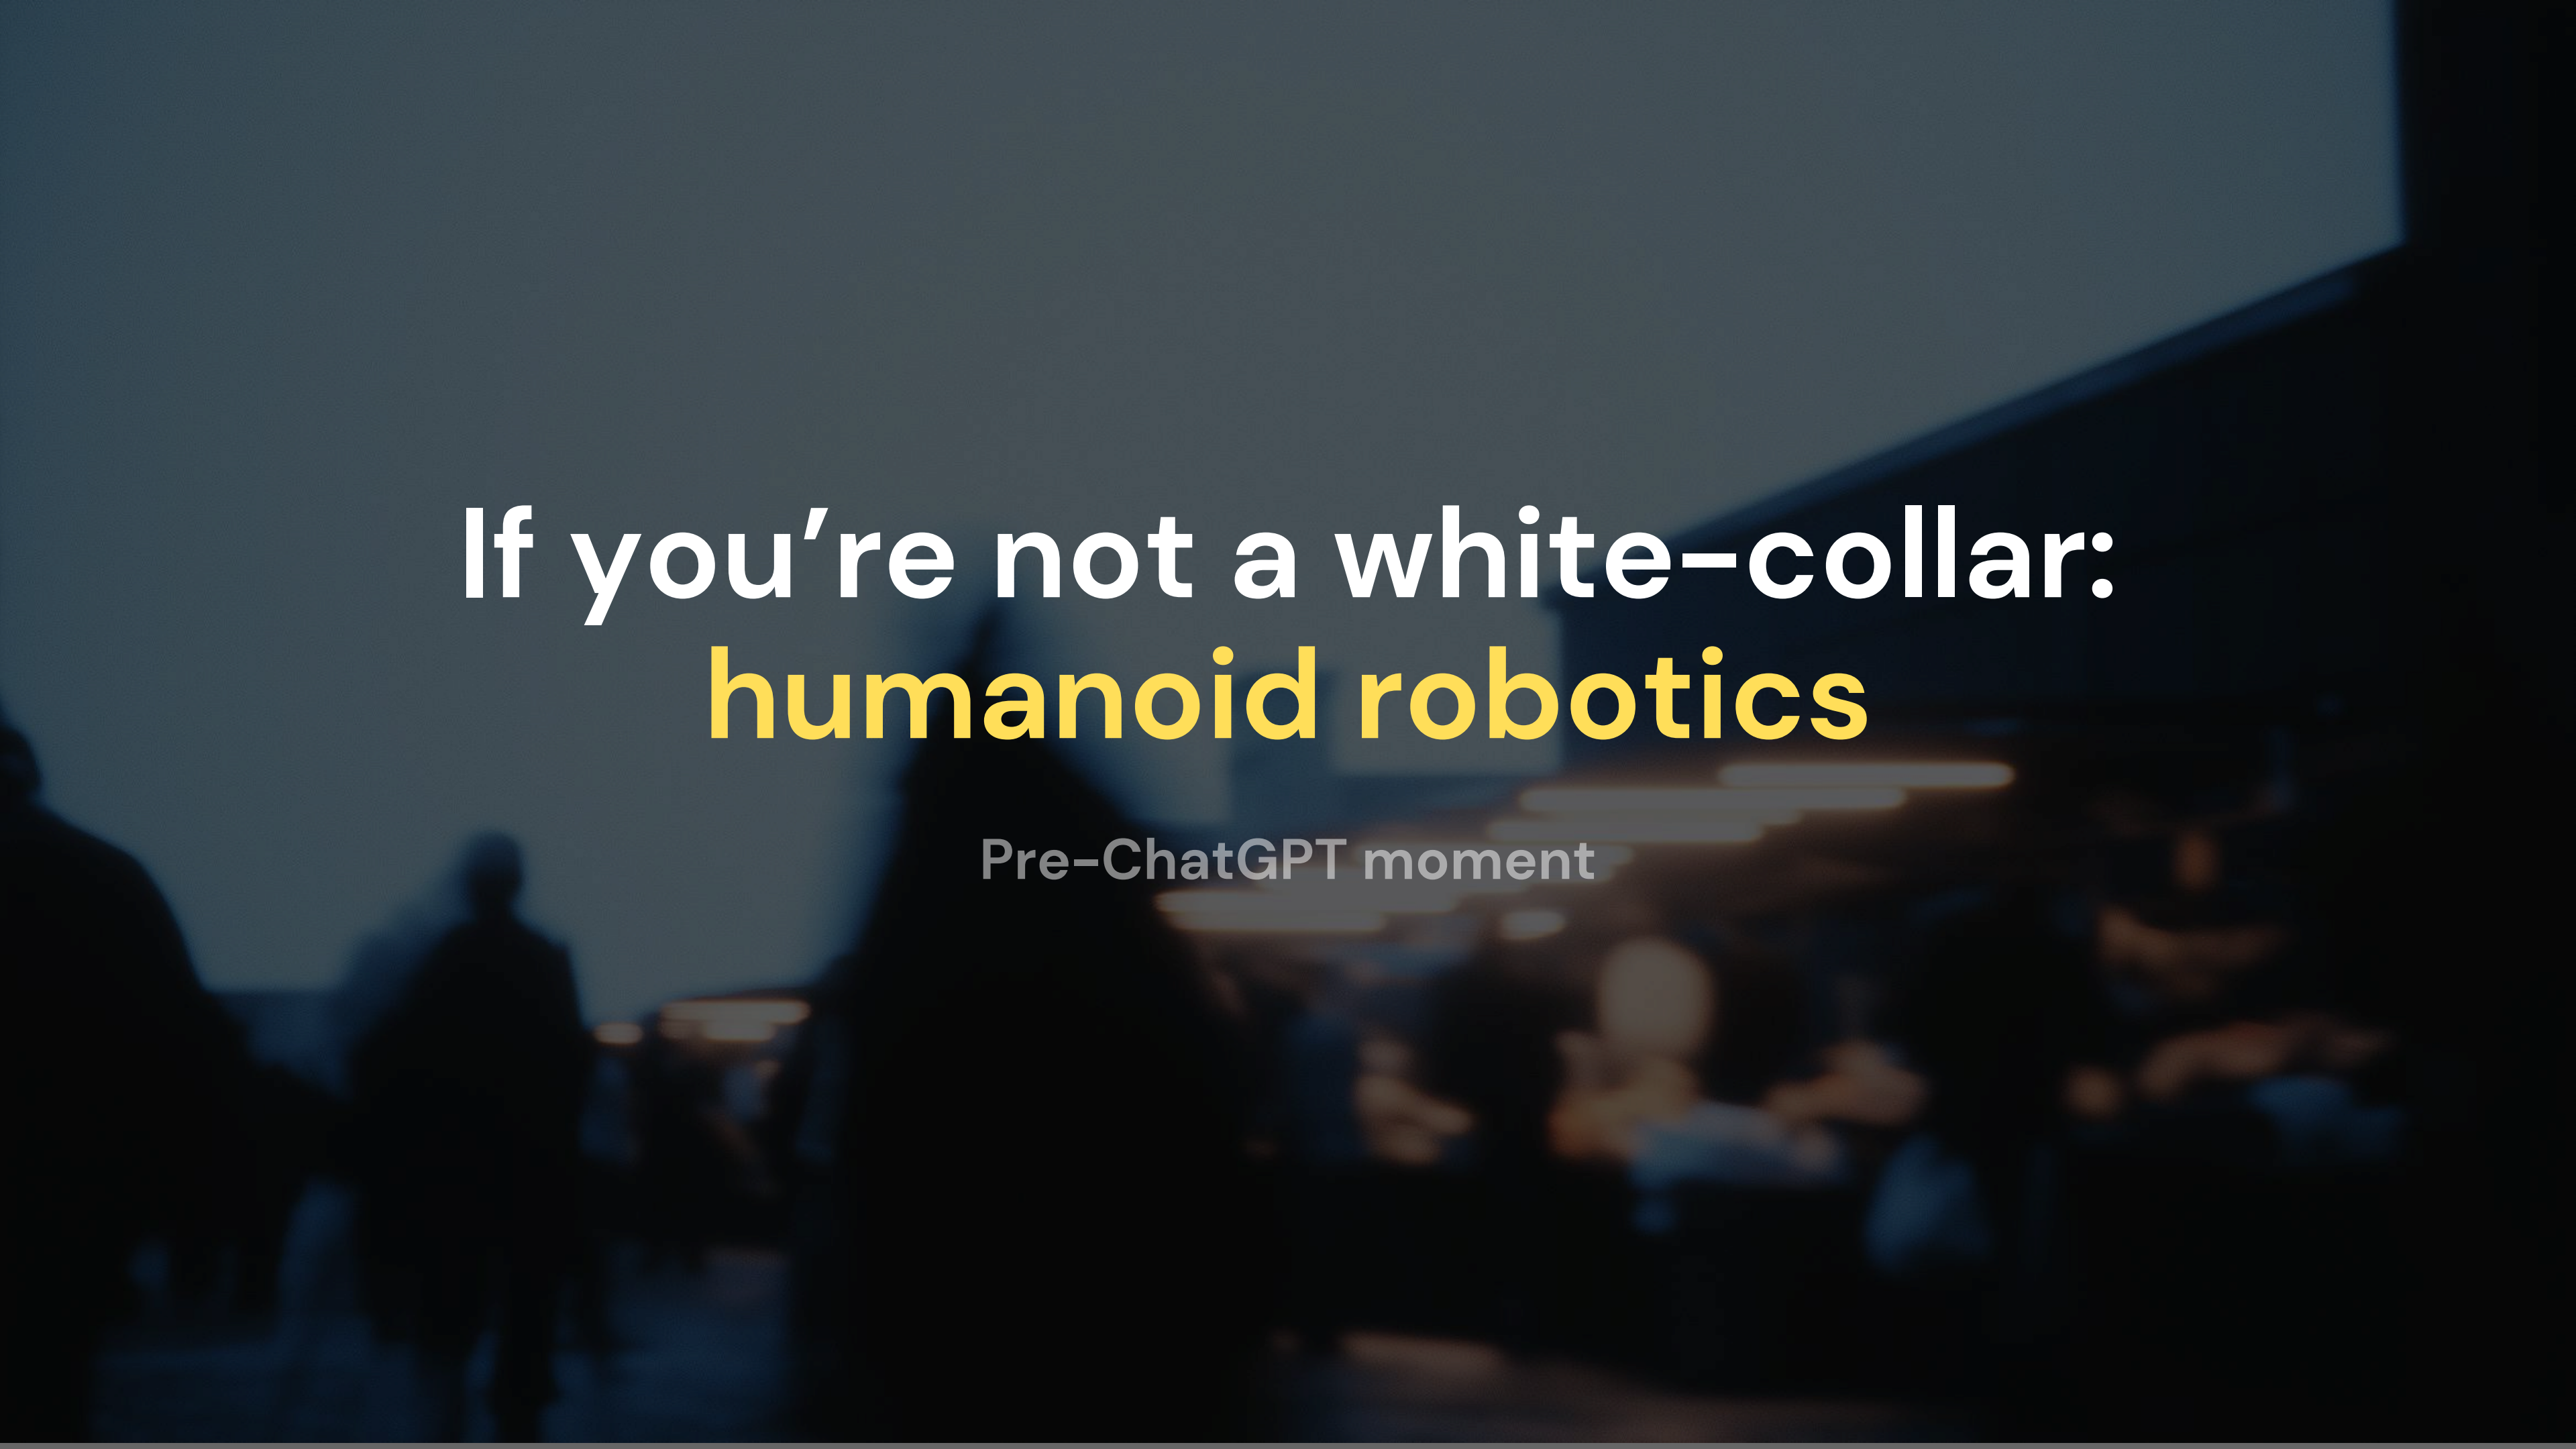

Relaxing and letting go

Accept to loose control

The cost of failure is **learning**

Risk pays off

If you're not a white-collar: **humanoid robotics**

Pre-ChatGPT moment

Thank you!
